What this is

9 practice questions for CONNECTICUT OCCUPATIONAL TRADES **M8ABXJ49**, each with its answer key and an explanation. Answer a question before you read its key — the explanation is worth more once you have committed.

If something looks wrong

Send us three things and we will check it:

- the exam code, **M8ABXJ49**
- the question number
- the email address on your order

Write to **support@mometrix.net**. We reply within one business day.

QUESTION 1 SINGLE CHOICE

Under the Connecticut G9 Limited Welding Contractor registration, which of the following best describes the scope of work the registrant is authorized to perform?

- ☐ A Any new building construction, including structural steel erection on high-rise projects statewide.
- ☒ B Welding work limited to specific structures or limits defined on the registration, as issued by the Connecticut Department of Consumer Protection.
- ☐ C Full plumbing, HVAC, and electrical contracting in addition to welding.
- ☐ D Unlimited welding on pressure vessels and boiler installations without any additional inspection.

ANSWER B

WHY The G9 Limited registration is a Connecticut occupational license issued by DCP that restricts welding activity to the specific structures, locations, or limits noted on the registration. The other options describe broader or unrelated contractor scopes.

QUESTION 2 SINGLE CHOICE

A contractor performing welding in Connecticut must hold the appropriate registration under which chapter of the Connecticut General Statutes?

- ☐ A Chapter 390, concerning real estate licensing.
- ☒ B Chapter 400, regulating home improvement contractors and home improvement salespersons, as administered by the Department of Consumer Protection.
- ☐ C Chapter 735, regarding professional engineers and land surveyors.
- ☐ D Chapter 541, concerning the sale of alcoholic beverages.

ANSWER B

WHY Welding contractor registrations (including G-limits such as G9) are issued under Connecticut's home improvement and occupational licensing framework administered by DCP, primarily under Chapter 400 of the Connecticut General Statutes. The other chapters govern unrelated occupations.

QUESTION 3

SINGLE CHOICE

Which of the following is a required ongoing condition for maintaining a Connecticut welding contractor registration?

- ☒ **A** Maintaining general liability coverage and any required surety bond on file with the Department of Consumer Protection.
- ☐ **B** Filing a federal EPA permit for every welding job site.
- ☐ **C** Membership in the American Welding Society (AWS) at the contractor level.
- ☐ **D** Paying a quarterly Connecticut corporate income tax regardless of activity.

ANSWER A

WHY Registered Connecticut contractors must carry the required insurance and surety instruments and keep them on file with DCP. The other options are not state-imposed prerequisites for the registration itself.

QUESTION 4

SINGLE CHOICE

Which OSHA standard most directly addresses the fire-protection responsibilities of a welding contractor performing hot work on a job site?

- ☐ **A** 29 CFR 1926.95, concerning head protection.
- ☒ **B** 29 CFR 1926.352, covering fire prevention and protection during welding, cutting, and other hot work in construction.
- ☐ **C** 29 CFR 1910.1200, covering the Hazard Communication Standard.
- ☐ **D** 29 CFR 1926.501, covering fall protection.

ANSWER B

WHY 29 CFR 1926.352 specifically addresses fire prevention and protection requirements for welding and hot work in construction, including responsibilities of the person performing or overseeing the hot work. The other citations address unrelated construction safety topics.

QUESTION 5

SINGLE CHOICE

When hot work is performed near combustible materials in construction, what is typically required to remain on site during and after the work?

- ☒ **A** A designated fire watch, with appropriate fire-extinguishing equipment readily available.
- ☐ **B** A licensed structural engineer to sign off each weld pass.
- ☐ **C** A journeyman electrician to verify bonding of the work clamp.
- ☐ **D** An OSHA compliance officer on continuous assignment.

ANSWER A

WHY Both OSHA 1926.352 and NFPA 51B require a fire watch whenever hot work is performed where combustible materials are present, along with suitable extinguishers. The other options describe roles that are not required by these standards.

QUESTION 6

SINGLE CHOICE

When a registered Connecticut welding contractor enters into a home improvement contract, which of the following is required to be included in the written contract?

- ☐ **A** The contractor's own projected profit margin for the project.
- ☒ **B** The contractor's registration number issued by the Department of Consumer Protection, along with the required notice of cancellation and other disclosures.
- ☐ **C** A list of every welding procedure specification the contractor is qualified to perform.
- ☐ **D** A copy of the customer's homeowners insurance declarations page.

ANSWER B

WHY Connecticut law requires home improvement contracts to include the contractor's DCP registration number and statutorily prescribed notices, including the notice of cancellation. The other items are not contract-content requirements.

QUESTION 7

SINGLE CHOICE

Under Connecticut's mechanic's lien statutes, a contractor who wishes to preserve lien rights must typically serve which document on the property owner?

- ☐ A A Notice of Owner's Right to a Fire Watch.
- ☒ B A Notice of Intent to Lien (or written notice as required under Conn. Gen. Stat. § 49-35) prior to or in conjunction with filing a certificate of completion.
- ☐ C A federal IRS Form 1099-NEC.
- ☐ D An EPA storm-water notice of intent (NOI).

ANSWER B

WHY Connecticut's lien statutes (found in Chapter 49 of the General Statutes, including § 49-35) impose written-notice requirements on owners as a condition for perfecting a mechanic's lien. The other documents are from unrelated legal frameworks.

QUESTION 8

TRUE FALSE

A Connecticut welding contractor registration must be renewed on the schedule set by the Department of Consumer Protection, and failure to renew can cause the registrant to lose the right to lawfully perform registered work.

- ☒ A True
- ☐ B False

ANSWER A

WHY True. Connecticut occupational registrations issued by DCP have defined renewal cycles, and lapsed registrations remove the legal authority to perform the registered work until reinstated. This is a core compliance concept for the G9 Limited exam.

QUESTION 9

MULTIPLE CHOICE

Which of the following documents are commonly required to be maintained or made available by a registered welding contractor operating in Connecticut? (Choose two.)

- ☐ **A** Proof of current liability insurance and any required surety bond on file with DCP.
- ☒ **B** Written home improvement contracts that include the DCP registration number and required statutory notices.
- ☐ **C** A copy of the customer's birth certificate for each project.
- ☒ **D** The state-issued registration certificate (or verification of the registration) available at the place of business or job site.

ANSWER B - D

WHY Registered contractors are expected to keep insurance/bond documentation on file, use written contracts containing their registration number and statutory notices, and make their registration readily verifiable. Customer identifying documents such as birth certificates are not required.
