What this is

9 practice questions for CONNECTICUT OCCUPATIONAL TRADES NGH9CJAK , each with its answer key and an explanation. Answer a question before you read its key — the explanation is worth more once you have committed.

If something looks wrong

Send us three things and we will check it:

- the exam code, NGH9CJAK
- the question number
- the email address on your order

Write to **support@mometrix.net**. We reply within one business day.

QUESTION 1

MULTIPLE CHOICE

Under the Connecticut Department of Consumer Protection registration classifications, which of the following work activities may be performed by an S7 Limited Contractor? (Choose two.)

- ☐ A New home construction of a complete single-family dwelling
- ☒ B Construction of an addition to an existing single-family residence
- ☒ C Installation and replacement of exterior siding on an existing structure
- ☐ D Full electrical service upgrades requiring a new utility service entrance
- ☐ E Foundation work for new commercial buildings

ANSWER B - C

WHY The S7 Limited Contractor registration is limited in scope and is intended for work on existing structures, such as additions, alterations, and certain exterior improvements like siding. It does not authorize new home construction, electrical service upgrades (which require an E-1 license), or commercial foundation work (which exceeds the limited classification).

QUESTION 2

MULTIPLE CHOICE

Which of the following are required for an S7 Limited Contractor to legally perform work in Connecticut? (Choose two.)

- ☒ **A** Registration with the Connecticut Department of Consumer Protection
- ☐ **B** A current Connecticut New Home Construction Contractor license
- ☒ **C** Compliance with the Connecticut Home Improvement Act registration requirements, where applicable
- ☐ **D** Master electrician certification for any wiring performed under the registration
- ☐ **E** A federal General Contractor license issued by OSHA

ANSWER A - C

WHY An S7 Limited Contractor must be registered with the Connecticut Department of Consumer Protection. If performing home improvement work as defined by Connecticut law, the contractor must also comply with the Home Improvement Act (HIA) registration requirements. There is no separate 'New Home Construction Contractor' license or OSHA-issued federal contractor license, and electrical work is not authorized under this limited registration.

QUESTION 3

SINGLE CHOICE

Which type of project is most clearly within the scope of work permitted for an S7 Limited Contractor in Connecticut?

- ☐ **A** Constructing a new detached two-car garage on a previously undeveloped lot
- ☐ **B** Building a new single-family home from the ground up
- ☒ **C** Performing a kitchen addition on an existing single-family residence
- ☐ **D** Installing a new commercial HVAC rooftop unit on a retail building

ANSWER C

WHY The S7 Limited Contractor registration covers limited work on existing residential structures, such as additions and alterations. A kitchen addition on an existing single-family residence fits this scope. New construction of a garage on undeveloped land, new home construction, and commercial HVAC work exceed the limited classification.

QUESTION 4

SINGLE CHOICE

A homeowner hires a registered S7 Limited Contractor to build a 200-square-foot family room addition onto their existing house. Under Connecticut law, which registration requirement must also be satisfied before the work begins?

- ☐ A No additional registration is needed beyond the S7 classification
- ☒ B Home Improvement Act (HIA) registration with the Department of Consumer Protection
- ☐ C A separate Elevator Mechanic license
- ☐ D A state-issued Public Works Contractor license

ANSWER B

WHY An addition to an existing residence qualifies as home improvement work under Connecticut's Home Improvement Act. A contractor performing such work must hold HIA registration in addition to the underlying occupational registration. Elevator and public works licenses are unrelated to this scope of residential work.

QUESTION 5

SINGLE CHOICE

An S7 Limited Contractor in Connecticut is generally limited to working on which category of structures?

- ☐ A New commercial buildings of any size
- ☒ B Existing one- and two-family residential structures
- ☐ C Industrial facilities and manufacturing plants
- ☐ D Public infrastructure such as bridges and water treatment plants

ANSWER B

WHY The S7 Limited Contractor registration applies to limited work on existing one- and two-family residential structures. New commercial buildings, industrial facilities, and public infrastructure fall outside the limited registration's scope and require other classifications or licensure.

QUESTION 6

SINGLE CHOICE

Which of the following tasks falls within the typical scope of an S7 Limited Contractor in Connecticut?

- ☐ A Installation of new structural beams to remove a load-bearing wall during a residential remodel
- ☒ B Replacement of existing windows with new units of similar size in an existing home
- ☐ C Installation of a new 200-amp electrical service entrance for a residence
- ☐ D Trenching and installation of a new septic system for a new home

ANSWER B

WHY Replacing existing windows with new units of similar size is a typical limited-scope improvement on an existing residence, within the S7 Limited Contractor's authorized work. Load-bearing wall modifications may exceed the limited scope, while electrical service work requires an E-1 license and septic systems require a separate registration.

QUESTION 7

SINGLE CHOICE

Before performing home improvement work in Connecticut, a registered contractor must provide the homeowner with a written contract containing specific disclosures. Which of the following items is required by the Connecticut Home Improvement Act to be included in that contract?

- ☐ A The contractor's federal tax identification number only
- ☒ B The contractor's HIA registration number and a description of the work to be performed
- ☐ C A copy of the contractor's OSHA 30-hour certification card
- ☐ D The contractor's personal driver's license number

ANSWER B

WHY The Connecticut Home Improvement Act requires that home improvement contracts include the contractor's HIA registration number along with a description of the work to be performed, the price, and other required disclosures. Federal tax ID only, OSHA cards, and driver's license numbers are not required contract elements.

QUESTION 8

SINGLE CHOICE

An S7 Limited Contractor has been hired to resurface the exterior of an existing residential deck. The homeowner asks the same contractor to also rewire the deck lighting. What is the correct course of action?

- ☐ A Perform both tasks under the S7 registration since the work is on the same structure
- ☒ B Decline the electrical work and advise the homeowner to hire a properly licensed electrician
- ☐ C Perform the electrical work only if the homeowner signs a liability waiver
- ☐ D Perform the electrical work and report it to the local building inspector afterwards

ANSWER B

WHY The S7 Limited Contractor registration does not authorize electrical work. Wiring and electrical installations must be performed by a contractor holding the appropriate electrical license (such as an E-1). The S7 contractor must decline the electrical portion and refer the homeowner to a properly licensed electrician.

QUESTION 9

SINGLE CHOICE

Under the Connecticut Home Improvement Act, what is the minimum notice requirement that a contractor must give the homeowner regarding the right to cancel a home improvement contract?

- ☐ A No notice of cancellation rights is required for contracts under \$500
- ☒ B The homeowner must be given notice of a three-business-day right to cancel for contracts signed at the home
- ☐ C A 30-day cancellation notice is required for all home improvement contracts
- ☐ D Notice of cancellation rights is only required if the contractor initiates the contact

ANSWER B

WHY The Connecticut Home Improvement Act provides homeowners with a three-business-day right to cancel contracts for home improvement work that are signed at the home, and the contractor must provide notice of this right. The other options misstate the timing, scope, or triggering conditions of the cancellation notice requirement.
