Before you begin

What this is

9 practice questions for Green Business Certification Inc. (GBCI) IDCB , each with its answer key and an explanation. Answer a question before you read its key — the explanation is worth more once you have committed.

If something looks wrong

Send us three things and we will check it:

- the exam code, IDCB
- the question number
- the email address on your order

Write to **support@mometrix.net**. We reply within one business day.

QUESTION 1 SINGLE CHOICE

Which of the following best describes the purpose of the Integrative Process credit category in LEED v4 for Interior Design and Construction?

- ☐ A To require third-party commissioning of all building systems before occupancy
- ☒ B To encourage project teams to perform early, cross-disciplinary analysis and optimize the взаимодействие between systems and credits
- ☐ C To mandate the use of a specific integrative design software platform on all LEED projects
- ☐ D To replace the LEED charrette requirement with a documented design analysis report only

ANSWER B

WHY The Integrative Process credit encourages the project team to begin LEED-related analysis early and to use a cross-disciplinary, systems-thinking approach so that synergies between credits and building systems are identified and optimized. The other options describe unrelated or non-existent LEED requirements.

QUESTION 2 SINGLE CHOICE

Under the LEED v4 ID+C Location and Transportation category, what is the primary intent of the 'Tenant Design and Construction Guidelines' prerequisite?

- ☐ A To provide tenants with a list of approved cleaning chemicals used in the project
- ☒ B To communicate design and construction guidelines to tenants so they can occupy the space in a sustainable manner
- ☐ C To restrict the type of tenant that may lease space in a LEED-certified building
- ☐ D To require tenants to sign a legal commitment to remain in the space for at least 10 years

ANSWER B

WHY The Tenant Design and Construction Guidelines prerequisite is intended to ensure that tenants receive a clear set of guidelines describing the sustainable design and construction features of the base building or tenant space so they can operate within them. The other options are not part of this prerequisite.

QUESTION 3

MULTIPLE CHOICE

Which of the following strategies can contribute toward earning points in the LEED v4 ID+C Energy Atmosphere category? (Choose two.)

- ☒ **A** Installing ENERGY STAR-rated equipment and appliances
- ☒ **B** Conducting a commissioning process for the project energy systems
- ☐ **C** Increasing the proportion of newly harvested hardwood from regional forests for interior millwork
- ☐ **D** Providing electric vehicle (EV) charging stations for building occupants

ANSWER A • B

WHY Both ENERGY STAR equipment/appliances and fundamental or enhanced commissioning are recognized strategies within the LEED v4 ID+C Energy Atmosphere category. Hardwood sourcing falls under Materials and Resources, and EV charging is part of Location and Transportation.

QUESTION 4

SINGLE CHOICE

Which LEED v4 ID+C Indoor Environmental Quality credit addresses occupant control over lighting levels through task lighting or dimmable controls?

- ☐ **A** EQ Credit: Daylight
- ☒ **B** EQ Credit: Interior Lighting
- ☐ **C** EQ Credit: Acoustic Performance
- ☐ **D** EQ Credit: Thermal Comfort

ANSWER B

WHY The 'Interior Lighting' credit in LEED v4 ID+C Indoor Environmental Quality rewards providing individual or shared lighting controls, including task lighting and dimmable controls. Daylight, acoustic performance, and thermal comfort are separate credits with different intents.

QUESTION 5

SINGLE CHOICE

According to LEED v4 ID+C Materials and Resources, what is the intent of the Construction and Demolition Waste Management credit?

- ☒ **A** To divert a percentage of construction, demolition, and packaging waste from landfill through reuse, recycling, or salvage programs
- ☐ **B** To eliminate the use of all packaging materials on the construction site
- ☐ **C** To require that all demolition debris be transported to a certified hazardous-waste facility
- ☐ **D** To mandate that the contractor use only reusable metal dumpsters throughout the project

ANSWER A

WHY The Construction and Demolition Waste Management credit rewards projects that divert a specified percentage of C&D waste (including packaging) from disposal in landfills through reuse, recycling, or salvage pathways. The other options distort the credit's actual intent.

QUESTION 6

SINGLE CHOICE

In LEED v4 ID+C, the Quality Views credit is part of which category?

- ☐ **A** Location and Transportation
- ☐ **B** Sustainable Sites
- ☒ **C** Indoor Environmental Quality
- ☐ **D** Energy and Atmosphere

ANSWER C

WHY Quality Views is an Indoor Environmental Quality credit in LEED v4 ID+C. It rewards providing direct lines of sight to the outdoors from occupied areas. Sustainable Sites covers site-level credits such as site development and rainwater management.

QUESTION 7 MULTIPLE CHOICE

Which of the following fixtures, when reduced in flow or flush rate, can contribute to the LEED v4 ID+C Water Use Reduction credit? (Choose two.)

- ☒ **A** Public lavatory faucets
- ☒ **B** Showerheads
- ☐ **C** HVAC condensate drain pipes
- ☐ **D** Fire-sprinkler test valves

ANSWER A • B

WHY Lavatory faucets and showerheads are water fixtures included in the baseline and proposed calculations for the Water Use Reduction credit. HVAC condensate drains and fire-sprinkler test valves are not regulated fixtures under this credit.

QUESTION 8 SINGLE CHOICE

Which LEED v4 ID+C credit addresses the control of tobacco smoke by prohibiting smoking inside the building and providing signage at building entrances?

- ☐ **A** EQ Credit: Indoor Air Quality Assessment
- ☐ **B** EQ Credit: Thermal Comfort
- ☐ **C** EQ Prerequisite: Indoor Air Quality Management
- ☒ **D** EQ Credit: Tobacco Smoke Control

ANSWER D

WHY The Tobacco Smoke Control credit specifically addresses prohibiting smoking inside the building and designating and marking exterior smoking areas a minimum distance from entries. Indoor Air Quality Assessment, Thermal Comfort, and the IAQ prerequisite have different intents.

QUESTION 9

SINGLE CHOICE

How many points may a LEED v4 ID+C project earn in the Innovation category, and how many of those may be awarded as exemplary performance for exceeding an existing LEED credit?

- ☐ A Up to 4 points total; up to 2 of those may be exemplary performance
- ☒ B Up to 6 points total; up to 3 of those may be exemplary performance
- ☐ C Up to 5 points total; up to 1 of those may be exemplary performance
- ☐ D Up to 10 points total; up to 4 of those may be exemplary performance

ANSWER B

WHY In LEED v4 ID+C, a project can earn up to 6 points in the Innovation category. Of those, up to 3 points may be awarded as 'Innovation in Design' for exemplary performance — achieving performance that significantly exceeds the requirements of an existing LEED credit.
