QUESTION 1

MULTIPLE CHOICE

A city ordinance prohibits parking on a particular street from 8:00 a.m. to 6:00 p.m. on weekdays. A driver parks there at 7:30 a.m. and leaves at 8:30 a.m. Which two facts would be sufficient to determine whether the driver violated the ordinance? (Choose two.)

- ☒ **A** The driver parked in a metered space
- ☒ **B** The driver remained parked after 8:00 a.m.
- ☐ **C** The driver had a residential parking permit
- ☐ **D** The driver parked in a loading zone

ANSWER A • B

WHY The ordinance's relevant prohibition applies from 8:00 a.m. to 6:00 p.m. on weekdays. The fact that the driver was parked in a metered space does not by itself establish a violation, and a residential permit or loading-zone status would require additional facts about their legal effect. Remaining parked after 8:00 a.m. establishes that the vehicle was present during the prohibited period, assuming the location and weekday meet the ordinance's conditions.

QUESTION 2

MULTIPLE CHOICE

Six students—F, G, H, I, J, and K—are assigned to six desks in a single row. F must sit at one end, and H must sit immediately to the left of I. Which two statements, if true, are consistent with these conditions? (Choose two.)

- ☒ **A** G sits at the other end.
- ☒ **B** F sits immediately to the right of I.
- ☐ **C** J sits between F and H.
- ☐ **D** K sits immediately to the left of F.

ANSWER A • B

WHY The statement that G sits at the other end is compatible with the conditions: one end can be occupied by F and the other by G while H remains immediately to the left of I. F sitting immediately to the right of I is also compatible if the row is arranged with I followed by F, with H immediately to the left of I. The other statements may force incompatible arrangements or make H's position impossible.

QUESTION 3

SINGLE CHOICE

A passage states that a policy reduced energy consumption but also increased household costs because the required equipment was expensive. Which conclusion is most strongly supported by the passage?

- ☒ **A** The policy achieved its environmental goal but created an economic trade-off.
- ☐ **B** The policy was successful because it reduced all household expenses.
- ☐ **C** The policy should be abolished because it increased costs.
- ☐ **D** The policy had no effect on energy consumption.

ANSWER A

WHY The passage directly describes both a benefit—reduced energy consumption—and a drawback—higher household costs from expensive equipment. Therefore, the best-supported conclusion is that the policy produced an environmental benefit along with an economic trade-off.

QUESTION 4

SINGLE CHOICE

All libraries in the district are open on Saturdays. The Oak Street building is a library in the district. Which conclusion must be true?

- ☒ **A** The Oak Street building is open on Saturday.
- ☐ **B** Every building on Oak Street is open on Saturday.
- ☐ **C** The Oak Street building is open on Sunday.
- ☐ **D** No libraries in the district are open on Sundays.

ANSWER A

WHY Because every library in the district is open on Saturdays and the Oak Street building is a library in the district, the Oak Street building must be open on Saturday. The passage does not establish anything about other buildings or Sunday hours.

QUESTION 5

SINGLE CHOICE

A scheduling rule requires that Project A be completed before Project B, and Project B must be completed before Project C. If Project C is scheduled for Friday, which day must Project A be scheduled?

- ☒ **A** Thursday or earlier
- ☐ **B** Friday only
- ☐ **C** Saturday or later
- ☐ **D** There is not enough information

ANSWER A

WHY Project A must precede Project B, and Project B must precede Project C. Since Project C is on Friday, Project A can be on Thursday or any earlier day, but it cannot be Friday or later.

QUESTION 6

SINGLE CHOICE

According to a passage describing a coastal wetland, the wetland protects inland areas by absorbing storm water and provides habitat for migrating birds. What is the main function described for the wetland?

- ☒ **A** It serves as both a natural flood buffer and wildlife habitat.
- ☐ **B** It is used primarily for commercial shipping.
- ☐ **C** It replaces the need for inland parks.
- ☐ **D** It prevents all coastal erosion.

ANSWER A

WHY The passage identifies two principal functions: absorbing storm water to protect inland areas and providing habitat for migrating birds. The other choices add facts not stated in the passage.

QUESTION 7

SINGLE CHOICE

If a rule applies to every employee who works on-site, and Maya works on-site, which statement follows logically?

- ☒ **A** The rule applies to Maya.
- ☐ **B** The rule does not apply to Maya.
- ☐ **C** Maya works off-site.
- ☐ **D** The rule applies only to managers.

ANSWER A

WHY The rule states a universal condition for all on-site employees. Since Maya is an on-site employee, the rule applies to her.

QUESTION 8

SINGLE CHOICE

A committee has exactly three members: L, M, and N. L and M cannot both serve on the committee, but the committee may contain either one of them. Which arrangement is possible?

- ☒ **A** L and N
- ☐ **B** M and N
- ☐ **C** L and M and N
- ☐ **D** L alone only

ANSWER A

WHY The condition prohibits L and M from serving together, but it does not prohibit either from serving with N. Therefore, a committee consisting of L and N is possible.

QUESTION 9

SINGLE CHOICE

A passage says that a particular medication can relieve symptoms but does not address the underlying cause of a condition. Which interpretation best matches the passage?

- ☒ **A** The medication treats symptoms rather than the underlying cause.
- ☐ **B** The medication cures the condition completely.
- ☐ **C** The medication is ineffective because it cannot relieve symptoms.
- ☐ **D** The medication prevents the condition from occurring.

ANSWER A

WHY The passage distinguishes symptom relief from treatment of the underlying cause. The most accurate interpretation is that the medication addresses the symptoms but not the cause.
